## ABSTRACT

A method for sharing an application is disclosed. The method includes
determining a position and a size of a non-DirectDraw region of a shared application
window by monitoring function calls made by the application, determining a position

10    and a size of an DirectDraw region of a shared application window by monitoring by
monitoring a DirectDraw COM interface, and capturing a screen shot of an image
corresponding to the non-DirectDraw and the DirectDraw regions of the shared
application window.
